"OF COURSE, THE PROTON IRIZ R5 IS READY FOR THE WRC"

MARCUS GRONHOLM

LATEST TECHNOLOGY

Designed and developed for use within the R5 category, the Proton Iriz R5 is eligible to compete in championships worldwide.

Based on the Proton Iriz chassis, the Iriz R5 boasts a bespoke 1.6-litre turbocharged engine, XTRAC 4-wheel-drive system, Cosworth electronics and Reiger suspension.

A proven package, consisting of the best components on the market

A PROVEN PACKAGE

Formed in 1982 by founder Chris Mellors, Mellors Elliot Motorsport has established itself as one of the world's leading motorsport preparation and build firms.

Having been built into a world-class business, the firm soon became responsible for the Proton Motorsport programme and secured their first World Rally Championship title in 2002 thanks Karamjit Singh and Allen Oh.

Further accolades followed over the years at both domestic, European, Asian and World Rally Championship level, with PG Anderson finishing second overall in the 2012 WRC2 Championship, driving the MEM Proton Satria Neo S2000.

Soon after, MEM began work on the Proton Iriz R5 which has undergone a rigorous development programme to ensure the right and left hand drive FIA homologated machine is more than ready for the world's stage

“WE HAVE A VERY GOOD PACKAGE HERE”

MARCUS GRONHOLM

PROTON IRIZ R5

FULL FIA HOMOLOGATION
